

Name:

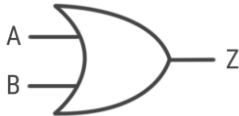

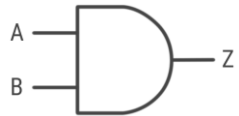

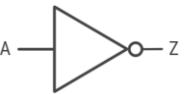

# Programming: Operations

A	Key vocab
<b>Operand</b>	A number (or string or Boolean) which is to be operated on
<b>String manipulation</b>	Operating on strings

B	Unfamiliar operations
<b>Concatenation</b>	Joins two strings together ":@" + "-)"
<b>Exponentiation</b>	Raises one number to the power of another 2**3
<b>Modulus / mod</b>	Returns the remainder after division 10 % 3 = 1
<b>Quotient / floor division</b>	Returns the whole number part of the division 10 // 3 = 3
<b>Unary</b>	Only has one operand -7

C	Types of operator
<b>Arithmetic operator</b>	An operator which turns two numbers into a single number with a mathematical process **, /, %, //, *, +, -
<b>Assignment operator</b>	An operator which assigns a value to a name =, =>
<b>Boolean operator</b>	An operator which compares Boolean values AND, OR, NOT
<b>Comparison operator</b>	An operator which compares two numbers >, <, >=, <=, ==, !=

F	Logic gates
---	-------------

OR gate		<table><tr><th>A</th><th>B</th><th>Z</th></tr><tr><td>0</td><td>0</td><td>0</td></tr><tr><td>0</td><td>1</td><td>1</td></tr><tr><td>1</td><td>0</td><td>1</td></tr><tr><td>1</td><td>1</td><td>1</td></tr></table>	A	B	Z	0	0	0	0	1	1	1	0	1	1	1	1	AND gate		<table><tr><th>A</th><th>B</th><th>Z</th></tr><tr><td>0</td><td>0</td><td>0</td></tr><tr><td>0</td><td>1</td><td>1</td></tr><tr><td>1</td><td>0</td><td>1</td></tr><tr><td>1</td><td>1</td><td>1</td></tr></table>	A	B	Z	0	0	0	0	1	1	1	0	1	1	1	1	NOT gate		<table><tr><th>A</th><th>Z</th></tr><tr><td>0</td><td>1</td></tr><tr><td>1</td><td>0</td></tr></table>	A	Z	0	1	1	0
		A	B	Z																																								
		0	0	0																																								
		0	1	1																																								
		1	0	1																																								
1	1	1																																										
A	B	Z																																										
0	0	0																																										
0	1	1																																										
1	0	1																																										
1	1	1																																										
A	Z																																											
0	1																																											
1	0																																											

D	Order of operations
<b>1 Brackets</b>	Whatever is in the brackets is resolved first
<b>2 Unary</b>	An operation with only one <i>operand</i>
<b>3 Indices</b>	Raising to the power of a number
<b>4 Division</b>	Including <i>quotient</i> and <i>modulus</i> division
<b>5 Multiplication</b>	× or *
<b>6 Addition</b>	+
<b>7 Subtraction</b>	-
<b>8 Comparison</b>	An operation which returns a Boolean by comparing two operands
<b>9 Boolean</b>	An operation which returns a Boolean by comparing two Booleans
<b>10 Assignment</b>	An operation which assigns a value to a name

E	Logic vocab
<b>Boolean algebra</b>	Mathematical expression of logic circuits
<b>Logic gate</b>	A component which takes in one or two binary inputs and produces a single binary output
<b>Logic circuit</b>	A circuit made of a combination of logic gates
<b>Truth table</b>	A table of inputs and outputs for a logic gate system
