

## Memory and Hardware Quiz

B	Peripherals
1.	Input, output or storage device which is not integral to the computer
Input device	A device which introduces ...2.
Examples 3.	
4.	
5.	
6.	
Output device	7.
Examples 8.	
9.	
10.	
11.	
Storage device	12.
Examples 13.	
14.	
15.	
16.	
17.	A device which attaches to a networked computer and makes it behave like a WAP

A	Secondary Storage: Types
18.	A type of SSD which stores information by forcing electrons through a barrier with a large current
Magnetic	19.
Optical	20.
21.	Memory with no moving parts

C	Primary Storage
Main memory	22.
Primary storage	
23.	Part of secondary storage which is used as main memory when RAM is full
24.	Single transistor / capacitor RAM which needs to be refreshed every few milliseconds
25.	4/5 transistor RAM which can hold data without being refreshed (but does need power)

D	Key Vocab
Read Only Memory (ROM)	26.
27.	Any hardware which can hold, read and write data
Storage medium	28.
29.	External high-capacity storage
30.	Memory which requires power
31.	Memory which persists without power
