Name: Information Technology: Initiate and Plan 1

A	Phases of a Project Life Cycle		Input		Output	
First Phase 1	Definition 2		3		5	
			4		6	
					7	
					8	

B	Key Vocab
9	Assessment at the end of a phase of what went well and what could have been improved with reference to the requirements and plans
10	Assessment after each repetition of a stage of development.
11	Brief outline of what to do next, in the absence of a full plan.
12	How easy to achieve something is
13	Something that is needed. *ie the product must appeal to 20-30 year olds*
14	Something that must not or cannot happen. *ie the project must not cost more than £8,000*
15	A specific planned outcome, which may be a small step in an overall project
16	The things you need to accomplish to know that the product is successful, written during the planning phase and checked in the evaluation phase
